Port Authority Marine Terminals
New York
- Administration Building and Maintenance Garage
- Passenger Ship Terminal

New Jersey
- Building 110
- Sign Shop
- Central Automotive and Stock
- Administration Building

PLAINTIFF'S EXHIBIT PX-651

George Washington Bridge Bus Station
Bus Station
East Building
Ventilation Building

World Trade Center
Tower A - Zone 1 and limited areas of the subgrade

Port Authority Bus Terminal
Main Building constructed before 1973

Port Authority Trans-Hudson
Shops at Waldo, Henderson, Pavonia and Hoboken
Newark Station

Additions may have to be made to the foregoing list. Generally any lding constructed prior to 1973 is a suspect asbestos containing building. :ause the Environmental Protection Agency in 1973 issued a ban on the use of ray-on fireproofing with asbestos, as a guide, all buildings constructed bsequent to that date may be considered as not containing this material.

The above locations are Port Authority owned structures. This listing does not include all structures where Port Authority personnel may work.

If you have any questions we will be happy to discuss them with you.

Harry Pool
